

ATEX FLO-DAR SENSOR AND LOGGER ENABLED FOR INTERNET DATA TRANSFER

The World famous Marsh McBirney Flo-Dar open channel meter is now available as an **ATEX certified PORTABLE** system with built in GPRS internet data transfer, the entire system can now be mounted in the zoned area with **nothing above ground**.

The system has a rechargeable Li battery that can be changed in the hazardous area.

Flo-Dar has a number of benefits including:

- Personnel have no contact with the flow during installation
- Maintenance caused by sensor fouling is eliminated
- No profiling required
- Field replaceable/interchangeable sensors and monitors
- Suitable for all shape pipes and channels from 100mm upwards
